Summary

- More than 4 years of experience in designing, developing and maintaining web applications using React JS, WordPress, REST APIs and other front-end technologies.
- Experienced developer wearing multiple hats from developing code, deploying into production, and supporting application.
- Capable of quickly learning and delivering solutions as an individual and as part of a team.
- Hands on experience in working with agile software lifecycle methodologies such as JIRA.
- Ability to translate business requirements and UI/UX designs into performant React components.

Technical Skills

Frontend technologies: HTML5, CSS3, JavaScript (ES6+), React JS, Redux, Node .JS, CSS, WordPress, TypeScript, Tailwind CSS

IDE and Version control: GitHub, Visual Studio Code, Visual Studio, Microsoft Office suite, Jira

Backend technologies: RESTful APIs, Python, Object Oriented Programming

Databases: Microsoft SQL Server (T-SQL), MySQL

Public cloud: Amazon Web Services (EC2, LightSail, S3, Route 53, ELB etc.)

Additional tools: Jira, Confluence, Unit testing (JEST)

Education

Full Stack Web Developer, Nano Degree	**June 2019 - Sep 2019**
Udacity	
Master in Information Technology	**Aug 2012 - Jun 2014**
Sardar Patel University, India	
Bachelor in Business Administration	**May 2007 - Jun 2011**
Sardar Patel University, India	

Experience

Maternity leave   **Aug 2021 – Present**

- Ready to resume my career.

Frontend Web Developer   **Sep 2019 - July 2021**
Emega Online, Glendenning, NSW

- Developed and maintained several **frond-end features for an inventory system using React, Tailwind CSS, Redux and Typescript.**
- Designed and developed internal websites using **WordPress and CMS.**
- **Collaborated with product managers and business stakeholders** to translate design mockups into pixel-perfect and functionally rich React components.
- Optimized existing react components for maximum performance across a vast array of web-capable devices and browsers, resulting in **60% increase in a user engagement**.
- **Designed independent components** to support different functions on internal warehouse operations.
- Integrated node modules to perform **CRUD operation using REST API** to support front-end application.
- Implemented unit and integration tests using **JEST unit testing framework** to ensure code quality and prevent regressions.
- **Worked with offshore team on project planning**, execution and reviewing work.
- Provided **support for technical customer queries** and regular releases into production.

Maternity leave   **Oct 2016 - Aug 2019**

- Completed Udacity Nanodegree of Full Stack web developer while taking care of maternity responsibilities.

Web Developer   **Jul 2014 - Sep 2016**
Madhuvan Securities Pvt. Ltd, India

- Designed and developed investment portfolio tracker **applications to serve more than 3000 customers on daily basis using ASP .NET, SQL Server and C#.**
- **Migrated legacy ASP.Net website into reusable React component library** for future use, resulting in a **40% reduction in overall development time** for new features.
- **Developed and deployed RESTful APIs** to support multiple features of web application.
- Provided support for developed applications **to resolve customer issues and production incidents.**
- Collaborated with the Product Owners to get the details of requirements and translate them in to working code.
- Created **ETL processing system** using Microsoft SSIS and T-SQL stored procedures.
- Created database objects such as **stored procedures, triggers, and functions using T-SQL to generate different investment tracking reports using Microsoft SSRS.**
- Performed **unit testing, integration testing** along with automated test cases using **selenium**, and other tools such as **Sauce Labs**.
